

Sayed Zaara Quadri

Hyderabad, India | +91 8639916571 | zquadri04@gmail.com | Github:- [zaaraquadrii](#) | LinkedIn: - [Zaara Quadri](#)

Software Engineer with experience developing enterprise applications using React.js, C#, .NET, Python, SQL Server, and REST APIs. Experienced in backend development, API integrations, machine learning, and scalable software solutions. Passionate about Generative AI, cloud technologies, and building intelligent applications using modern AI frameworks.

SKILLS

Languages: Python, JavaScript, SQL, C#
Frontend: React.js, HTML5, CSS3, Tailwind CSS
Backend: .NET, REST APIs, Node.js
Databases: SQL Server, PostgreSQL, SQLite, Supabase
AI/ML: TensorFlow, Keras, Scikit-Learn, Pandas, NumPy
Tools: Git, GitHub, Vite, Agile, OOP, Data Structures & Algorithms

EXPERIENCE

- SFON Technologies | Hyderabad, India
- Full Stack Developer Intern** Nov 2025 – Apr 2026
- Developed enterprise web applications and REST APIs using React.js, C#, .NET, and SQL Server.
 - Built responsive dashboards, reusable UI components, and backend services for employee management and reporting systems.
 - Integrated biometric attendance systems and optimized database operations for improved performance.
 - Developed a rule-based calculation engine with dynamic business logic and REST API integration.
 - Contributed throughout the Software Development Life Cycle (SDLC), including development, testing, deployment, and maintenance.
- Code for India Foundation
- Machine Learning Intern** Nov 2024
- Performed exploratory data analysis and machine learning model development using Python, Scikit-Learn, and TensorFlow.
 - Built predictive models on real-world datasets to support civic and social impact initiatives.

PROJECT

- Plant Disease Recognition System
- Developed and deployed a CNN-based image classification system for real-time plant disease detection using TensorFlow and Streamlit.
 - Built a Streamlit application for real-time disease prediction and recommendations.
- Credit Card Fraud Detection
- Built a real-time fraud detection system using SMOTE, Random Forest, and XGBoost.
 - Deployed using Streamlit and optimized model performance for classification accuracy.
- Diabetic Retinopathy Classification
- Developed a deep learning-based image classification system to detect and classify stages of diabetic retinopathy from retinal fundus images.
 - Built and trained a Convolutional Neural Network (CNN) using TensorFlow and Keras with image preprocessing, augmentation, and model evaluation techniques.

EDUCATION

- Deccan College of Engineering & Technology
- Bachelor of Engineering – Information Technology (CGPA: - 8.7/10)** Nov 2026
- Certification**
- IIT Hyderabad – AI & Machine Learning Student Training Program May 2025 – Oct 2025
- Completed a 24-week intensive AI/ML program covering Machine Learning, Deep Learning, Feature Engineering, and Model Evaluation.
